

# Unleash Your Potential

## NLP Master Practitioner Certification, NFNLP USA

**Neurolinguistic Programming (NLP) Master Practitioner is an advanced level training that will advance your personal growth, give you more authority, more confidence, and more in-depth insight into the motivations that determine Human Behaviour.**

NLP Master Practitioner Training can be used for Personal and Business Development. For personal development, this course will teach you to clarify a sense of purpose and direction, improve your relationship, understand how people make decisions, Language Patterns etc.

This complete NLP Master Practitioner training covers a wide range of essential life principles that you can use to grow your relationships, heighten your effectiveness and develop a deep understanding of human behaviour, motivation, and learn how to influence people positively.

NLP relates our perceptions, personal beliefs, emotions, behaviours, attitudes and communication styles to the results and outcomes we experience on a day-to-day basis. NLP Master Practitioner methodologies offer immediately relevant skills in areas such as business, therapy, coaching, teaching, influence, leadership, management etc.

NLP Master Practitioner is a thought-provoking training, that will provoke you to evaluate your world-views and attitudes in light of generating positive improvements in all areas of your life, works and relationships.

### **What NLP “Mastery “is all about?**

This NLP Master Practitioner Training builds upon the skills and techniques developed in the NLP Practitioner course. Alongside refining and consolidating these skills, the NLP Master Practitioner offers advanced techniques and furthers your ability to make generative change for yourself and those you work with. During this course you will explore the core principles that underpin the change process, learn how to make transformation at the deep neuro logical level of identity and discover the unconscious programs that determine our fundamental ways of being.

NLP mastery applies to all logical levels. Acting so that you achieve your chosen goals. Integrating your skills so that they support you in your endeavors. Perceiving yourself, others, and the world,

in a manner which enables you to let your natural brilliance shine through. Being more truly yourself. Being at one with the world. During the NLP Master Practitioner training course, you will discover the SECRET to all NLP patterns – the models of model of successful intervention and change; you could call it the Meta NLP Pattern.

### **Who is this Programme for?**

After the practitioner comes the Mastery. On this course, you will learn the deeper secrets of NLP and the methods to truly make you a master of NLP. Only available for those having taken a recognized NLP Practitioner course

## **COURSE CONTENT**

### **MODULE 1: ADVANCED LANGUAGE PATTERNS**

Master Practitioners are masters of language. Learn how to use language masterfully and at a higher level to generate change, influence, persuade, and communicate with greater success. Learn how to word adverts, write gripping speeches & spin, encourage, influence and persuade with more mastery. This helps you enormously with getting people motivated or excited, convincing people, selling, negotiating, marketing, life coaching and therapy practices. Includes conversational coaching and Hypnosis

### **MODULE 2: META PROGRAMS**

Learn the different automatic unconscious programmed patterns, personality traits and character traits that are running unconsciously and causing their preferences and inclinations. Learn to do personality and character assessments, personality profiling for careers, relationships, life coaching and in business. Fit the right person to the right job and help people find the easiest way to achieve their goals by working to their natural strengths and tendencies. Knowing 'profile types' is a great help when you want to write

sales and marketing pitches to a specific person type or person group and to target a particular audience. Help people choose the right partner too.

### **MODULE 3: VALUES AND CLARE GRAVES MODEL (SPIRAL DYNAMICS)**

Following on from Meta Programs, where you learned about character and personality patterns, we now add the deep unconscious drivers and unconscious core values, our deepest programs and unconscious presuppositions. This enables you to do great person to job fit, relationship building and strengthening, self-understanding and corporate work in HR, management, alignment and team building.

### **MODULE 4: MODELING**

There are so many skillful ways to reframe. Increase your ability to reframe, comment on and change the direction on any debate, argument or situation. These distinctions make it easier to chunk up, down or sideways, throw doubt on the other persons position and know when to use Meta Model or Milton Model when locked into a communication. It is great for winning arguments, for negotiating, a great aid in using the Meta model more artfully to dispel dysfunctional or mad thinking.

### **MODULE 5: META STATES**

States about states, thoughts about thoughts and feelings about feeling. A higher meta position takes on experience. States that override other states, for example one can feel frustrated about being depressed or feel angry about feeling shy. We have certain “theme” states that can habituate and override the expected feelings relevant to a certain stimulus or situation.

### **MODULE 6: MODELING**

- Presenting your Modeling Projects
- Life Coaching Practice
